The Model #MB505 is your answer if you have a filmless system. Our PATENTED system has adjustable dowels that are higher (17") than the standard pivot arms (12"). This allows you to accommodate the taller cassettes. And, with our dowel system, it is easier and faster to accommodate larger patients.

We are so certain you will be thrilled with our MB505 we will send you one for a 1-week trial period.

All of our products come with a full 1-year warrantee (not 60 or 90 days).
